Corporate Press Release

NuDesign's Embedded SNMP Agent Technology Monitors Leitch's Video Products

TORONTO, Ontario, October 27, 2004 – NuDesign Team, Inc., a premiere provider of Visual SNMP/HTTP management software development tools, and Leitch Technology International, Inc, a leading provider of broadcast video processing equipment, have formed a development partnership to equip Leitch video product lines with NuDesign's Embedded SNMP Agent for VxWorks technology.

NuDesign's SNMP agent development tools for VxWorks (and other RTOS environments) allow designers to quickly create SNMP/HTTP agents for development and prototyping purposes. The NuDesign code generation wizard generates C++ agent code as well as an immediately compilable project for use with the Tornado development suite. The wizard also generates MIB-dependant Web pages that can be modified for a custom look and feel. The MIB II subagent is included with the product. A standalone Agent or Master Agent with dynamically loadable extension Subagent structures are supported.

"This relationship has helped improve our tools and libraries. Leitch has had specific feature, reliability and performance requirements. Our teams have worked closely together to meet these objectives." said Stan Kmiec, president of NuDesign.

"Leitch is committed to enhancing remote manageability of our products through standard protocols, we have found that NuDesign's rapid development tools and robust SNMP technology, along with their expertise made them an excellent partner for this program" said Steve Sulte, Manager of Systems Architecture for Leitch.

Fully functional evaluations of Visual Embedded xAgentBuilder for C++, SNMP/HTTP agent code generator are available at www.ndt-inc.com.

About NuDesign

NuDesign Team (<http://www.ndt-inc.com>) specializes in providing Visual SNMP development tools and libraries: agent code generators for embedded and desktop OS environments, MIB Builders, Browsers and ActiveX Controls to developers worldwide.

Headquartered in Toronto, Ontario, NuDesign's mission is to provide embedded systems customers with highly automated, rapid deployment, management information agent C++ code generation technology, supporting SNMPv3, web protocols and serial, command line secure access. NuDesign's code generation technology is management objects centric, enabling re-use of existing or creation of new instrumentation code, for access by SNMP and/or web based applications.

About Leitch Technology

Leitch Technology is a global leader in the design, development and distribution of high-performance video systems for the professional television industry. With a 33 year history and a broad portfolio, Leitch is the industry's most trusted name for increasing performance and productivity through solutions that enable a truly Integrated Content Environment (ICE).
